# Bornholm in the past

- 1980's: Traditional society with focus on agriculture, fishing and tourism (and related industries)
- 1990's: A new reality – recession in the fishing industry, centralizing trend in agriculture and new markets in tourism
- 2000's: A new identity – new answers to the question “What can we do with what we got?”

# Bornholm today

Three main focus areas:

- Self-sufficiency
- Sustainability
- Job creation

# Bright Green Island

“Bright Green Island is a vision about people, the economy, values, knowledge and technology that together puts Bornholm on the worldmap as a 100% green and attractive island. It is the vision of an island that is based on 100 % sustainable energy.

An island where one acts responsibly both environmentally and ethically. An island where people can live healthier, richer lives with less hustle and bustle, because we invest in our nature and get high returns from our year-round sensory experiences.”
