General description of our company: EURO HEAT is in business of manufacturing plate heat exchangers since 1995. Continued investment in improvement of product quality, training of our employees, professionalism in dealing with our customers has led to the enlargement of product range. The quality and dedication to work was recognized by the European Bank for Development, which funded the development of our products. Today, EURO HEAT in addition to its core business of manufacturing of plate heat exchanger produces and heating substations, individual measurement and regulation sets and heat meters. Production takes place in modern production facility of 1500 m ² . Has 20 employees whose further education is considered as very important resource of company. Exporting our products has been growing from year to year, and currently 45% of our production is exported to countries of European Union, Russia,	

Belarus, and countries of former Yugoslavia. Standard: ISO 9001, ISO 14001, ISO 18001, GOST-R, CE- PED 97-23/EC

Your partner to build small district heating systems

Company name:

A.D. IZOLIR

Fields of our activities for small district heating:

Fluid transport pipelines (transports of hot water, transports of heat, oil transports...); installed in channels, with thermal insulation of polyurethane rigid foam and PE cover pipe, or combination of mineral or glassy wool and rigid PU foam and PE cover pipe. Pipes produced in previously explained way could be covered by concrete plates in concrete channels or covered by sand and narrow material of surrounding soil. We produce pipes in length of 6 or 12m, all fittings (elbows, tees, valves, reducers and so on) for pipeline and muffs for insulation field welded connections of the steel pipes.

Hydro pre-insulated steel pipe for transport of the natural gas, crude oil, heating oil or water in length of 6 or 12m. The system of this kind of hydro insulation is well known as 3LPE - Three Layers of Polyethylene. This system is much better than classic system of hydro insulation using the PE tapes directly at the site, saves the time and money too. All pipes are tested during production to the electric resistant (Holliday testing). The thickness of the PE is min. 1,8mm and more depends of the steel pipe diameter.

PE gas and water pipes OD110 up to 280mm, SDR11 and SDR17 in length of 6 up to 12m.

Steel pipe supports produced of rigid PU foam and protected with HDPE outside. Steel pipe diameters from 21,3 up to 273mm. The length of the pipe supports could be from 50mm up to 1m.

References:

In 2008. year, Program: "The reconstruction of the local district heating system in Serbia - Phase III", co-funded by the Federal Republic of Germany, the German KfW and financial institutions of the Republic of Serbia for which implementation was responsible the Ministry of Mining and Energy of the Republic of Serbia.

With the program were included:

- "Energetika"DOO, Kragujevac, pipeline with diameter from Ø 33,7 to Ø 273,0
- JKP "Toplana"Kraljevo, pipeline with diameter from Ø33,7 to Ø 273,0
- DP "Grejanje"Zrenjanin, pipeline with diameter from Ø 42,4 to Ø 406,4
- JKP "Energana"Sombor, pipeline with diameter from Ø 33,7 to Ø 355,6
- JKP "Gradska Toplana"Piro, pipeline with diameter from Ø 33,7 to Ø 168,3

Other district heating systems are equipped by Izolir pre insulated pipes and pipe elements are:

Bor, Požarevac, Sremska Mitrovica, Smederevo, Bečej, Lazarevac, Subotica, Čačak, Kraljevo, Beograd, Bačka Palanka, Valjevo, Gornji Milanovac, Kikinda, Kovin, Kragujevac, Loznica, Majdanpek, Niš, Novi Sad, Novi Kneževac, Paraćin, Podgorica, Priština, Sombor, Soko Banja, Šid, Kruševac, Zaječar, Vranje, Novi Pazar, Nova Varoš, Piro, Banja Luka...

General fields of our activities:

Thermoinsulation - IZOPEN - pre insulation of steel pipes and pipe elements with polyurethane for transportation of hot and cold fluids. With this technology is mostly use to perform: heating pipelines, pipelines, oil pipelines, industrial installations for transport of fluids, home installation, gas stations, ...

Hydroinsulation - IZOPOL - pre insulation of the steel pipes with polyethylene, for transportation of gas, water, oil and other fluids where is not required the preservation of the thermal properties of the flowed fluid.

Product – range IZOPEN

- ✗ pre-insulated pipes IZOPEN PC130
- ✗ pre-insulated pipes IZOPEN PC200
- ✗ pre-insulated piping elbow IZOPEN PCL
- ✗ pre-insulated fixed point IZOPEN PFT
- ✗ pre-insulated spur-line IZOPEN PEO
- ✗ pre-insulated reduction parts IZOPEN PRK
- ✗ pass through wall IZOPEN PKZ
- ✗ polyethylene or thermo shrinkable joints IZOPEN PSE
- ✗ pre-insulated packaged valve

pre-insulated dilation parts IZOPEN PDL (customer demand)

General description of our company:

The development path of AD "IZOLIR" begins on April 17, 1984 year, when Mr. Miroslav Matic with his 7 closest associates founded the Contracting organization of associated labor.

Today the company operates under the name "IZOLIR" as a joint stock company and it is privately owned. The company A.D. "IZOLIR" is run by Mr. Miroslav Matic all these 35 years, and he still successfully running a company. AD "IZOLIR" currently employs 80 workers in permanent employment.

AD "IZOLIR" operates at two separate locations with a total business and production space of 11,000 m² and warehouse space of 30,000 m².

AD "IZOLIR" is the first domestic factory and leader in the field of pre-insulated pipes for district heating and following equipment, as well as in manufacturing pre-insulated pipes for high pressure gas pipelines.

Our strategy and our advantages are always new products, where our team of experts for the past 25 years works on conquest of new technologies, improvement of old and improvement of the quality of existing programs when it comes to technology for insulation with polyurethane and polyethylene.

Your partner to build small district heating systems

Company name: Radiator Inženjering DOO	
Fields of our activities for small district heating: In addition to primary production activities "Radiator-Engineering Ltd Kraljevo, performs works of thermo installations (heating, ventilation-air conditioning, installation of technical gases), makes and mounts steel constructions.	
References: Our heating boilers were installed in many towns in our country, in Prijepolje, Beograd, Mokra Gora, Novi Sad, Subotica etc. (Boilers of industrial class from 100-500KW of power are installed there, some in cooperation with Austrian company Gilles). http://www.radiator.rs/references_en.php Our development system is described in case study "FIRING UP BIOMASS HEATING SYSTEM DEVELOPMENT WITH SOLIDWORKS SOLUTIONS" http://www.solidworks.com/sw/successes/customer-story.htm?record=Radiator-In%C5%BEEenjeri&id=6534	
General fields of our activities: Radiator Inženjering d.o.o. (Radiator Engineering Ltd) is a leading manufacturer of solid-fuel, biomass-pellet, and liquid-fuel heating boilers; heating systems and boilers for residential use; storage tanks for fuel oil; and boiler buffer tanks.	
General description of our company:  "Radiator Engineering" Ltd in the business sense is the legal successor of craft shops "Radiator", which was founded in 1991. year, whose main activity was the installation and maintenance of central heating which today we still do. First Boiler on solid fuel we have created 1985th year. The company is in today's form exists since 2002. year and from year to year, makes great progress steps, always trying to be first in the application of new technologies, quality products and wining new - the	

European market. Main activity of company is the production of boilers to solid and liquid fuels. Other activities of the company are installation and maintenance of central heating and production of steel structures. Product quality is based on knowledge of professional people in the company, which is proof of obtaining recognitions and many awards for quality. As we expanded and perfecting the production, we came to a level that boilers are made by latest world technologies. From the field of cutting sheet metal shall be allocated: laser cutting, CNC plasma process and CNC punching. The procedure is performed robotic welding and the use of machines. The best indicator of quality products and services is the fact that every year production increases.

Today "Radiator - Engineering" employs over 350 workers of which 40 of them are graduate mechanical engineer's that work every day on improving product quality.

Sure stability of quality, both product and operations firm, was confirmed by obtaining a certificate of quality system ISO 9001:2008.

Your partner to build small district heating systems

Company name:
Thermaflex

Please insert your company logo here

Fields of our activities for small district heating:

Thermaflex is the manufacturer of Flexalen pre-insulated pipes – diameter range d16-d225. The medium pipe is made out of Polybutylene, which is known for its flexibility and durability. Insulation and outer casing are made of PE. We strive for cost efficiency, fast installation and durability.

We supply in 3 levels of prefabrication.

1. Separate pipes, joints and insulation kits.
2. Elongated flexible T-pieces, which form a network when connected.
3. Complete prefabricated network that can be rolled out in place.

Rolling out tomorrow's thermal networks

References:

Flexalen pre-insulated pipes are in use all over Europe as well as in very demanding environments like Caribbean islands and Antarctic snow. Our solutions can for example be found in:

- Energie Steiermark, Austria
- Heiligenkreuz, Austria
- Otopeni, Romania
- Lucenec, Slovakia
- Novo Mesto, Slovenia
- Purmerend, The Netherlands-
- La Capelle Marival, France
- Lyngdal, Norway
- Wörgl, Austria
- Maldives
- Cancun, Mexico
- Rotorua, New Zealand

General fields of our activities:

Aside pre-insulated pipes for district heating/cooling and other thermal energy projects, Thermaflex has built a solid reputation in Technical Insulation products. We manufacture truly sustainable and extremely durable insulation, awarded the number one quality/suitability certificate: Cradle to Cradle.

General description of our group:

Thermaflex is a privately owned company, where taking care of future generations has been in our very nature since 1976.

We are active in 45 countries and operate 5 production plants in Europe, Middle East, Russia and Thailand.

Vaš partner za izgradnju malih centraliziranih toplinskih sustava

Imetvrtke: Vodoskok d.d.	
<p>Naše aktivnosti vezane uz centralizirane toplinske sustave:</p> <ul style="list-style-type: none"> - implementacija modernih tehničkih rješenja za povećanje energetske učinkovitosti u toplinskim mrežama – sustav predizoliranih plastičnih polibutenskih (PB) cijevi Thermaflex Flexalen (optimizacija toplinskih i hidrauličkih gubitaka, rješavanje problema uzrokovanih korozijom i inkrustacijom, minimiziranje troškova priključivanja potrošača, ubrzanje izgradnje cjevovoda) - tehnička podrška pri planiranju i projektiranju energetski održivih sustava (naglasak na zaštitu okoliša, smanjenje emisije stakleničkih plinova, korištenje alternativnih izvora energije – biomasa, bioplin, geotermalna voda, solar) - tehnička podrška pri montaži sustava (aparati za zavarivanje, alati) 	
<p>Reference:</p> <p><i>Toplovodni cijevni sustavi Thermaflex Flexalen su u posljednjih 20 godina instalirani u brojnim projektima izvedenim u Republici Hrvatskoj. Navodimo razvode iz kotlovnica, razvode geotermalne vode, toplinske mreže na postrojenjima s bioplinom i biomasom, sekundarne distributivne cjevovode od toplinskih stanica, razvode u sustavima s toplinskim pumpama).</i></p> <p><i>Dodatno možemo navesti projekte s predizoliranim cijevnim podzemnim sustavima za distribuciju rashladne vode u hotelsko-apartmanskim objektima i kampovima u priobalnim područjima te projekte za distribuciju vruće sanitarne vode.</i></p>	
<p>Općenito područja našeg djelovanja:</p> <ul style="list-style-type: none"> - proizvodnja tlačnih PEHD cijevi za distribuciju vode i plina - proizvodnja PP cijevi i okana za gravitacijsku odvodnju - prodaja kompletnih cijevnih sustava za niskogradnju i visokogradnju - savjetovanje i inovativna tehnička rješenja za održivi razvoj i izgradnju
